

## Introducing the latest version Netshift Secure Browser – V 8.0

Based on our heritage of building kiosk browser technology and solutions going back to 1997, we are now delighted to announce the release of our latest and most secure and feature rich product to date.

Netshift Version 8.

- ☞ Locks down operating system and prevents unauthorised access
- ☞ Provides secure browsing environment for public locations
- ☞ Built to leverage advanced security and visualisation features of Microsoft Windows 7 (User Access Control, Windows Presentation Foundation)
- ☞ Uses IE8 as core browser engine
- ☞ Website filtering/white list management
- ☞ Virus protection – ESET Nod 32 kiosk version
- ☞ Includes a library of interfaces for immediate installation and deployment.
- ☞ On screen virtual keyboard
- ☞ Customised interfaces can be easily created using standard XML tools
- ☞ Integrated document viewer for PDF and all Microsoft Office applications
- ☞ Designed to handle complex modern websites
- ☞ Handles multiple popup windows
- ☞ Remote monitoring, diagnosis, management and content update capability
- ☞ Communications via https – enabling easier deployment behind corporate firewalls and proxy servers
- ☞ Payment module – interfaces to most payment, printing and vending peripherals.
- ☞ Javascript API available for website access to peripherals
- ☞ Yespay chip and pin authorised
